Aaron McCormack — Speaker Kit

Founder, SysWisdom.AI • AI Quality & Operational Preparedness Authority

About Aaron McCormack

Aaron McCormack brings 28+ years of quality engineering experience and systems thinking to the AI safety conversation. Mentoring under Data Scientists and AI Scientists, Aaron helps organizations move past AI hype into rigorous operational readiness, focusing on completeness, consistency, and validity.

Signature Speaking Topics

1. The AI Trust Problem: What Your Organization Needs to Know Before Production
A 45-minute keynote covering the three domains of AI failure (slop, drift, and hallucination) with a practical Green/Yellow/Red decision framework.

2. GuardRails in Production: Managing AI Reliability at Scale
A technical deep dive exploring runtime interception, deterministic circuit breakers, and code-level verification using the open-source *syswisdomGuardRails* framework.

3. Map Your AI Risk: Interactive Workshop
A 90-minute hands-on workshop mapping team workflows against AI quality dimensions.

The Wisdom Formula

Completeness + Consistency + Validity = Wisdom
Ensuring systems evaluate the entire context, produce stable repeatable outcomes, and remain grounded in operational reality.
